

KOMBUCHA KALEIDESCOPE

gybiobuddies.weebly.com

Got kombucha leather scraps? With these instructions you can learn how to use those extra scraps to create some cool patterns!

1 GET YOUR MATERIALS

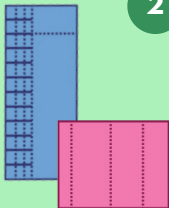

- Scissors
- Toilet paper tube
- 3 rectangles of shiny tape
- Kaleidoscope template
- 2-inch Petri-dish
- Construction paper
- Markers
- Clear tape
- Kombucha leather scraps
- Plant material
- Anything you want to put into your kaleidoscope!

2 PRINT & TRACE

Print out the kaleidoscope template and cut on solid lines to create a mirror paper template and a paper tube holder template.

Place the templates on construction paper and cut them out.

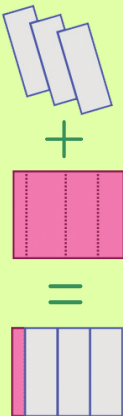

3 FOLD

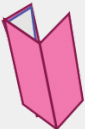

Fold the mirror paper along the dotted lines so that it looks like a triangular prism with an extra end tab.

4 ADD SOME SHINE

- Mark the inside of the mirror paper with a marker. Unfold the mirror paper. On the paper there are three big rectangles, each for a piece of shiny tape.
- Peel the backing off of a piece of shiny tape and carefully stick onto one of the rectangles on the inside of your mirror paper.
- Repeat for the other two pieces so that each rectangle on the mirror paper has been covered by a piece of shiny tape.

5 TAPE

Refold your mirror paper so that the shiny tape faces in and the extra tab on the end is on the outside.

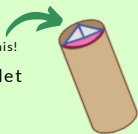

Use clear tape to tape the extra tab down and make the mirror paper into an open triangular prism.

6 INSERT

Place the mirror prism into the toilet paper tube. You can also decorate the outside of the paper tube.

Like this!

7 CREATE THE TUBE HOLDER

Take your paper tube and your paper tube holder. Wrap the tube holder around the paper tube. Tape the overlap of the paper tube together so that you can turn the paper tube inside of the holder, but so that the holder is fairly tight around the tube.

DO NOT TAPE THE HOLDER TO THE TUBE.

Align the bottom of the tube with where the holder's flaps start. Bend the flaps up. If you set your tube on a table, the flaps should be flat on the table.

8 ADD THE PETRI DISH

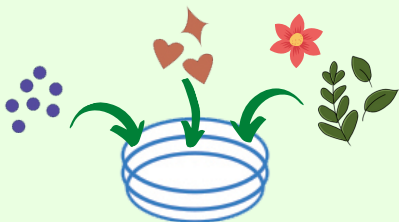

- Get your petri-dish and take off the lid. The lid is the larger side.
- Place the lid on the table with the top up. Place and center your tube on the lid.
- Fold the flaps down the side of the petri dish and tuck under the lid.
- Take the bottom of your petri dish and close the petri dish.
- This should hold all of the flaps in the petri dish and your tube should now be connected!

This should hold all of the flaps in the petri dish and your tube should now be connected!

9 ADD SCRAPS

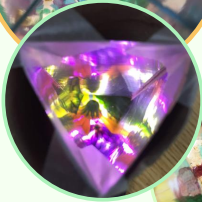

Open your petri dish and place scraps of kombucha, plant materials, and other desired add-ins. Close petri dish.

10 DECORATE & EXPLORE!

Hold your kaleidoscope up to your eye. Holding the bottom, turn the tube to make some cool patterns!

TIP: You can hold up your kaleidoscope to light to make the patterns look brighter!

Happy Crafting!!
